We also confirm that the above-mentioned Products were produced and packed in compliance with **Regulation (EC) 94/62** on packaging and packaging waste.

The products and material above is manufactured using the following starting components: 100% recycled PET material. The material/egg packs may exclusively be used for the packaging of eggs in the shell.

According to Regulation (EU) 10/2011, the overall migration limit, for which a maximum value of 10 mg/dm² or 60 mg/kg is set, we inform you that under standard condition the typical results of the global migration measured on above-mentioned Products are below the limits prescribed by this regulation.

CERTIFICATE OF CONFORMITY R-PET

Test conditions:

Overall migration: ethanol 10% (for 10 days, at 40 °C), acetic acid 3% (for 10 days, at 40 °C) and vegetable oil (for 10 days, at 40°C)

Type of contact: total by immersion

The material contains substances, which are restricted in the above legislation, for which specific migration limits are (SML), in EU directives and these are the following:
